

19661224-197702 New Zealand Refining Co Ltd Overall Plot Plan

This 24th December 1966 plan updated in February 1977 clearly shows the TEL (Tetra Ethyl Lead) Plant at the centre lower half (between the Black Components and the White Components) on the New Zealand Refining Company Limited overall plot plan. Yet when Brian Arndt was talking to the Professor who runs the New Zealand Register of Poisons and Toxic Substances, he [the Professor] was amazed that they had no record of the Lead Plant at Marsden Point Refinery.
